ZONING FROM: I-RR

TO: SF-4A

AREA: 3.700 acres

SUMMARY STAFF RECOMMENDATION:

The Staff's recommendation is to grant single family residence small lot (SF-4A) district zoning.

ZONING & PLATTING COMMISSION RECOMMENDATION:

September 6, 2005: *APPROVED SF-4A DISTRICT ZONING; BY CONSENT.*
[J. MARTINEZ; J. GOHIL – 2ND] (8-0, B. BAKER – ABSTAINED)

ISSUES:

None at this time.

DEPARTMENT COMMENTS:

The subject property is platted and under construction for 26 single family residential lots, zoned interim – rural residence (I-RR, upon its annexation into the City limits) and takes access to National Park Boulevard, Lake Clark Lane and Wind Cave Trail. The property is adjacent to other platted single family residential sections of the Parkside at Slaughter Creek subdivision (I-SF-4A and under consideration for SF-4A zoning). Please refer to Exhibits A (Zoning Map), A-1 (Aerial View) and B (Vicinity Map).

The Applicant proposes to rezone the lots to the single family residence small lot (SF-4A) district to be consistent with the plat. SF-4A zoning is appropriate given the size and setbacks of the platted lots, and is consistent with the interim zoned SF-4A portions of Parkside at Slaughter Creek.

EXHIBIT C

SUMMARY STAFF RECOMMENDATION:

The Staff's recommendation is to grant single family residence small lot (SF-4A) district zoning.

BACKGROUND

The subject property is platted and under construction for 26 single family residential lots, zoned interim – rural residence (I-RR, upon its annexation into the City limits) and takes access to National Park Boulevard, Lake Clark Drive and Wind Cave Trail. The property is adjacent to other platted single family residential sections of the Parkside at Slaughter Creek subdivision (I-SF-4A and under consideration for SF-4A zoning).

The Applicant proposes to rezone the lots to the single family residence small lot (SF-4A) district to be consistent with the plat. SF-4A zoning is appropriate given the size and setbacks of the platted lots, and is consistent with the interim zoned SF-4A portions of Parkside at Slaughter Creek.

BASIS FOR LAND USE RECOMMENDATION (ZONING PRINCIPLES)

1. The proposed zoning should be consistent with the purpose statement of the district sought.

The single family residence small lot (SF-4A) district is intended as an area for moderate density single-family residential use, with a minimum lot size of 3,600 square feet. In appropriate locations, small lot single-family use is permitted under standards that maintain single-family neighborhood characteristics.

2. Zoning changes should promote an orderly and compatible relationship among land uses.

SF-4A zoning is appropriate given the size and setbacks of the platted lots, and is consistent with the interim zoned SF-4A portions of Parkside at Slaughter Creek.

EXISTING CONDITIONS**Site Characteristics**

The subject property is under construction for single family residential development. The site is relatively flat and there appear to be no significant topographical constraints on the site.

Impervious Cover

The maximum impervious cover allowed by the SF-4A zoning district would be 55%, which is based on the more restrictive watershed regulations described below.

Environmental

The site is not located over the Edward's Aquifer Recharge Zone. The site is in the Desired Development Zone. The site is in the Slaughter Creek Watershed of the Colorado River Basin, which is classified as a Suburban Watershed by Chapter 25-8 of the City's Land Development Code. Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

<i>Development Classification</i>	<i>% of Net Site Area</i>	<i>% with Transfers</i>
Single-Family (minimum lot size 5750 sq. ft.)	50%	60%
Other Single-Family or Duplex	55%	60%
Multifamily	60%	70%
Commercial	80%	90%

According to flood plain maps, there is no floodplain within, or adjacent to the project boundary.

Tree protection will be required in accordance with 25-8 for all development.

Critical environmental features in this subdivision were identified and addressed with the review of the preliminary plan (C8J-02-0198).

Under current watershed regulations, development or redevelopment on this site will be subject to the following water quality control requirements:

- Structural controls: Sedimentation and filtration basins with increased capture volume and 2 year detention.

Transportation

No additional right-of-way is needed at this time.

The trip generation under the requested zoning is estimated to be 429 trips per day, assuming that the site develops to the maximum intensity allowed under the zoning classification (without consideration of setbacks, environmental constraints, or other site characteristics). This property is currently platted and consists of 26 platted lots which generate approximately 248 trips per day.

A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

Water and Wastewater

The landowner intends to serve each lot with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing the water and wastewater

utility improvements, offsite main extension, and system upgrades to serve each lot. The water and wastewater utility plan must be reviewed and approved by the Austin Water Utility. The plan must be in accordance with the City design criteria. The utility construction must be inspected by the City. The landowner must pay the associated and applicable City fees.

Compatibility Standards

The proposed SF-4A district zoning does not trigger the application of compatibility standards.
